

Congratulations on purchasing Kaboom Confetti's range of Flix Stix.

These are ideal if you want all the excitement of a confetti cannon launch but don't have the clearance space...or want little children to be involved in the launch.

Filled with 2.5cm x 5cm confetti rectangles designed to float longer than traditional confetti and make for easy clean up after the event.

These units are awesome!

For the best possible result follow these easy steps.

Hold your flix stix vertically.

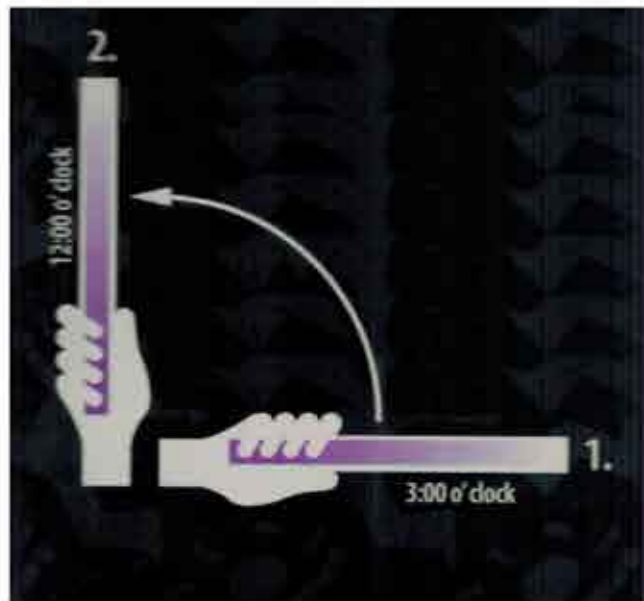

Using your finger nail simply press end of Flix Stix that has tissue paper cap until a hole appears.

Make this hole as large as possible in the end of the Flix Stix.

Hold the unopened end and **SLOWLY** position your arm in the 3 o'clock position.

Bring your arm quickly to the 12 o'clock position in one rapid flicking motion, fully extending your arm, like you are casting a fishing rod.

Repeat until all the Flix Stix confetti is out of the tube.

Once empty please dispose of tube in recycling or domestic rubbish.

Got a great photo #KaboomConfetti on Social Media to get awesome discounts and great prizes.

Thanks and have an awesome time
